

You can help determine the direction of research about reproductive health and epilepsy.

In this research study, we're asking people with epilepsy who are female or assigned female at birth and their caregivers and health care providers to share with us their questions about reproductive health and epilepsy. **With your input, we can conduct future research studies that address the concerns of people directly impacted by epilepsy.**

You can join this research study if you are:

- At least 14 years old;
- Living in the United States; and
- A person with epilepsy who is female or assigned female at birth OR a caregiver or neurologist for this population

The research study involves completing an online survey. You will get a \$25 gift card for completing the survey.

Joining this research study is your choice, and you can stop participating at any time. The research study is being done at the University of Pittsburgh/UPMC Children's Hospital of Pittsburgh.

If you would like to join the research study, please scan the QR code or email us.

Please direct questions to Erin Friel at frielem@upmc.edu or (412) 659-6845.
